

Transportation

The director of transportation, under the program supervision of the business manager and as delegated by the superintendent, will manage the transportation system, including fleet maintenance; driver recruitment, training, and assignment; route design and attendant logistics; and maintenance of pertinent records regarding fuel consumption, miles traveled, fleet repair, and riders transported.

It is the board’s intent to provide via purchase or lease, an efficient, safe, and functional fleet of vehicles for transporting students on regular and special education routes and field trips. Further, the board may arrange for the use of school vehicles for approved staff and organizational use, and administrative and maintenance functions.

Those eligible to ride school vehicles on regular routes include assigned staff and resident students who live outside the corporate limits of their attendance center. Also, students residing in the district who attend legally approved private schools or students outside the district who attend a School District #145 school as an option student may use district transportation to the extent they can utilize established pick-up and drop-off sites. Principals will determine eligible student and assigned adult riders for all student activity and field trips. It is the board’s intent that one-way riding times on any regular route not exceed 60 minutes. The board reserves the discretion to provide at-cost route service to groups of parents who live within the Eagle and Waverly corporate limits.

Student activity and field trips that relate to educational purposes and fall within budget limitations may be authorized by building principals. Any overnight trips must be approved by the superintendent and reported to the board. The board will maintain after-school, activity routes during the regular sports seasons to selected drop-off points outside of Waverly.

Student behavior regulations will be devised by the transportation director with input from building principals. Drivers will be responsible for student behavior on regular routes and report infractions to the transportation director; however, no student will have riding privileges suspended without consultation with appropriate principal. On activity or field trips, assigned adult sponsors are responsible for maintaining rider discipline and reporting infractions to the appropriate teacher and/or principal.
