

**Publications**

Student publications are important components of the instructional program at Waverly High School and contribute directly to the accomplishment of course and curricular goals. The board supports the development of student produced newspapers and annuals at Waverly High School as part of the regular curriculum. Sponsors and the building principal are responsible to approve publications and maintain high and ethical standards for all publications.

In addition to these publications, School District #145 values the promotion of student achievement through media sources such as newspapers, newsletters, e-mail, and school web pages. In an effort to recognize students and their accomplishments, district teachers and administrators are responsible to approve the use of student names, grade levels and photographs on publications. Student work may be showcased in media sources as approved by teachers and/or building administrators.
